## Objective:

Highly skilled and experienced data scientist with a track record of success in both Company X and Company Y. Proficient in a range of programming languages and tools, with a strong ability to lead teams and adapt to new challenges. Seeking opportunities to leverage expertise in data science to drive innovation and business growth.

## Experience:

### Data Scientist - Company Y (2019 - 2024)

- Led a team of data scientists in developing machine learning models for predictive analytics.
- Utilized TensorFlow and PyTorch for deep learning projects, achieving significant improvements in model accuracy.
- Implemented Spark and Spark MLlib for big data processing, optimizing performance and scalability.
- Conducted data analysis using Tableau and Plotly, generating actionable insights for business stakeholders.
- Collaborated with cross-functional teams to deploy machine learning solutions into production environments.
- Mentored junior team members, fostering their professional growth and development.

### Data Scientist - Company X (2014 - 2019)

- Spearheaded data science initiatives, focusing on improving customer engagement and retention.
- Employed Python, Pandas, and Scikit-learn for data preprocessing and predictive modeling tasks.
- Managed MySQL and Oracle databases, ensuring data integrity and accessibility for analysis.
- Developed web applications using Flask and HTML to visualize and interact with data.
- Served as a team leader, coordinating project timelines and priorities to meet business objectives.
- Demonstrated adaptability in rapidly evolving business environments, delivering solutions on time and within budget.

## Education:

Master of Science in Data Science  
University U1  
2014

## Skills:

Programming languages: Python, Java  
Data science: TensorFlow, PyTorch, Spark, Spark MLlib, Pandas, Scikit-learn  
Data analysis: Tableau, Plotly

Databases: MySQL, Oracle  
Web: Flask, HTML  
Soft skills: Team leadership, Adaptability

## **Certifications:**

TensorFlow Developer Certificate (2022, Expires: 2025)

## **Recent Projects:**

### **Chat with Your Data Using Retrieval Augmented Generation**

- Implemented a conversational AI system using retrieval augmented generation techniques.
- Leveraged natural language processing models to enable users to interact with data through chat interfaces.
- Enhanced user experience and accessibility of data-driven insights.

### **Improve Resume Using the Power of LLM**

- Applied large language model (LLM) techniques to optimize and personalize resume content.
- Utilized advanced natural language processing algorithms to highlight key skills and achievements effectively.
- 

## **Languages:**

Fluent in French, English, and Spanish.
